

Preface

The Demographic Yearbook of the Administrative Districts of Municipalities with Authorized Municipal Authority is one of yearly updated publications for territorial administrative units – demographic yearbooks of the Czech Republic, of the NUTS3 regions, of the Administrative Districts of Municipalities with Extended Powers and of the towns.

The publication provides a statistical overview of demographic development of the individual administrative districts of municipalities with authorized municipal authority (AD AMA) for the last ten years in the currently valid territorial breakdown. The latest edition thus covers the period 2011-2020, with the territorial division of individual AD AMA corresponding to the administrative division valid as of 1 January 2021.

The Yearbook was released in 2009 for the first time and referred to the period 1995-2008. Since 2010, it has referred to the last ten-year period only. The publication is available in electronic version on the CZSO website.
