

Preface

The Demographic Yearbook of the Administrative Districts of Municipalities with Extended Powers is one of yearly updated publications of the series of demographic yearbooks published for individual territorial administrative units. These are demographic yearbooks of the Czech Republic, of regions (NUTS 3), of districts, of administrative districts of municipalities with extended powers, of administrative districts of the municipalities with authorized municipal authority and of the towns.

The publication provides a statistical overview of demographic development of the individual administrative districts of municipalities with extended powers (AD MEP) for the last ten years in the currently valid territorial breakdown. The latest edition thus covers the period 2011-2020, with the territorial division of individual AD MEP corresponding to the administrative division valid as of 1 January 2021.

This Yearbook was released (in printed and CD-ROM version) in 2005 for the first time, and covered the period 1995–2004. Since 2006, it has been published only on CZSO's website. Since 2008, it has referred to the last ten-year period only.
