<sup>1)</sup> Starting with data for the year 2021, the production carried out under sub-contracted operations has been consistently included in published outputs. This specific supplier-customer way of production is in absolute majority of cases a minority form of production and the comparability of data in the time series has not been broken. As for goods having an important proportion of newly included production carried out under sub-contracted operations there is a note added.

More detailed information is provided in the methodological introduction to the publication.
