31. SELECTED INDICATORS ON COHESION REGIONS AND REGIONS

The NUTS classification (from the French version Nomenclature des Unités Territoriales Statistiques) is a fundamental systematic tool for providing of statistical information to the European Union. At present it comprises four levels, which are defined by the population size and area (NUTS 3 level is the lowest). At lower levels, so-called local administrative units (LAU) have been introduced. Prague is not broken down into LAU levels.

NUTS 0 refers to the state of the Czech Republic

NUTS 1 refers to the territory of the Czech Republic

NUTS 2 refers to cohesion regions, i.e. to 8 groupings of NUTS 3 regions

Moravskoslezský Region (MSK)

NUTS 3 refers to regions, i.e. to 14 higher territorial self-governing units

LAU refers to municipalities, i.e. to 6 258 municipalities (as at 1 January 2020)

Summary of cohesion regions (NUTS 2) and regions (NUTS 3):

NUTS 2	NUTS 3
Praha	HI. m. Praha <i>Region</i> (PHA)
Střední Čechy	Středočeský <i>Region</i> (STČ)
Jihozápad	Jihočeský <i>Region</i> (JHČ) Plzeňský <i>Region</i> (PLK)
Severozápad	Karlovarský <i>Region</i> (KVK) Ústecký <i>Region</i> (ULK)
Severovýchod	Liberecký <i>Region</i> (LBK) Královéhradecký <i>Region</i> (HKK) Pardubický <i>Region</i> (PAK)
Jihovýchod	Vysočina <i>Region</i> (VYS) Jihomoravský <i>Region</i> (JHM)
Střední Morava	Olomoucký <i>Region</i> (OLK) Zlínský <i>Region</i> (ZLK)

Notes on tables

Moravskoslezsko

Immigrants are in the regional context persons, who moved/migrated (registered a change of their place of residence) to a given cohesion region (or a Region) from another cohesion region (or a Region) or from abroad. Emigrants are in the regional context persons, who from the given cohesion region (or a Region) migrated out (registered a change of their place of residence) to another cohesion region (or a Region) or to abroad. Data for the Czech Republic include only persons, who migrated from abroad or to abroad.

Gross domestic product in the breakdown by region is based mainly on the production method of calculation as a sum of values added of local units (workplaces), which are economically active on the territory of a given region and net taxes on products.

Net disposable income of households is an amount, which households (residents on the territory of a region) can spend on final consumption, savings in the form of financial assets, and accumulation of tangible and intangible assets. It shows the way the balance of primary income is redistributed: by current taxes, social contributions and social benefits, and other current transfers.

The average monthly amount of old-age pension as at 31 December of the reference year is the average amount of full single old-age pension paid in December per pensioner.
