
INTRODUCTORY WORD

Dear Users,

This first summary of statistical data for capital City of Prague* for 2022 is dedicated to be used by the most general public.

Data, published in this booklet, were obtained thanks to your willingness to answer questions of the Czech Statistical Office surveys carried out in households, enterprises, or in government institutions. Thank you for that. These are data which, in their aggregated forms, are utilised by other users, yet also by those who were their originators – that means private enterprises, government institutions, and the general public.

This year, the brochure contains the data from Population and Housing Census 2021, that was held in March 2021. Census provides lots of important data: what is the educational structure of population, in which economic branches people work, how many foreigners is in Prague and how many households. How many children lives in households and data on commuting to work or school. This all for city sections or cadastral territories in Prague.

The CZSO website is the main source of statistical data for the public. **All data, which are under standard regime of processing and cover the whole Capital City of Prague and the city sections** can be found at www.praha.czso.cz. You can find all issued **publications** there, too.

If you are interested in other data, do not hesitate to contact us.
