

## FOREWORD

*The Statistical Yearbook of Prague is a key publication of the Regional Office of the Czech Statistical Office in Prague. It brings a summary statistical overview about the Region and its individual territorial units. Thanks to its scope, it can depict demographic, social, and economic development of the Region in more detail and in a summary way. Furthermore, it also provides selected data on the environment. Already the 22nd volume of this publication is issued this year. It was always an important advantage of all previous editions as well as of this year's one that besides a content-unified structure in all Regions, as for the structure of chapters, the publication followed the relevant edition of the Statistical Yearbook of the Czech Republic prepared by the Czech Statistical Office.*

*The content of this year's Yearbook follows in many aspects the previous editions issued. In this edition, the main change in terms of the content is that we have included a chapter with selected data from the Population and Housing Census, which is an important statistical event that takes place in decennial intervals. Furthermore, in the chapter called "Elections", readers can find results of elections to local councils, Prague City Assembly and to one third of the Senate of the Parliament of the Czech Republic that were held in September. Data on the Region are published, basically, for the period from 2019 to 2021; in selected indicators, it is in a longer time series since 2000. The publication is available mainly in electronic form on the Internet, but also in printed form.*

*As at 1 January 2021, pursuant to the Act No 51/2020 Sb, on the Administrative Territorial Structure of the State, boundaries of some Districts and administrative districts changed; boundaries according to this new Act have been reflected in the map at the end of the Yearbook. A chapter called "Basic characteristic" provides more detailed information on changes to the territories. However, it is necessary to underline that all data published there (including cartograms) correspond to the territorial structure valid precisely in the relevant year.*

*In terms of territory, besides information on the Region, also available data by administrative districts are published here; in the chapter called "Capital city of Prague" data on city sections and cadastral territories are published. Readers will find well-arranged comparisons of Regions in the electronic form of the Yearbook on the website or directly in a separate publication called "Comparison of Regions in the Czech Republic" (to be published on 17 January 2023).*

*It is impossible for tables to contain a more detailed breakdown of data due to the extent of the Yearbook. Readers who are interested in more detailed data can directly address Information Services Units of Regional Offices of the Czech Statistical Office.*

*Methodological notes on individual chapters are provided together, as a summary, after the data section. References and links to data sources used for preparation of the Yearbook, explanation of abbreviations used in the Yearbook and of symbols used on the geographical map of the Region are also added to them.*

*State statistical surveys are the basic source for the published data. Besides data sources of the Czech Statistical Office, available data from ministries and other institutions (listed in detail in an overview of "Data sources – links to ministries and other institutions" as well as in relevant tables, graphs, and cartograms) were used. A large part of published data is regularly entered into the regional databases of the CZSO – e.g. KROK (data on Regions and Districts) and MOS (statistics of towns and municipalities) or it is provided in long-term time series. The Public database that is accessible on the CZSO website at: <https://vdb.czso.cz/vdbvo2/faces/en/index.jsf> is also an important data source.*

*The regional statistical yearbook is not intended to encompass all pieces of information collected and processed by the State Statistical Service. More detailed data on development of the Region, administrative districts or Prague city sections are also published in other products of the Regional Office (e.g. Statistical Bulletin, publications on demographic matters, thematically focused analyses, etc.), which are available in electronic form on the Internet. Many other pieces of useful information can be found namely on the website of the Regional Office of the Czech Statistical Office in Prague ([www.praha.czso.cz](http://www.praha.czso.cz)), not only the latest data, but also interesting information about the Region, graphical outputs, information for respondents of statistical surveys, information about activities of the Regional Office itself, and much more. In the end of October 2022, another regional analysis was published, this time with the topic of "Basic trends of demographic, social, and economic development of the Capital City of Prague" (Czech only; in Czech it reads: "Základní tendence demografického, sociálního a ekonomického vývoje hl. m. Prahy"); it was elaborated in all Regions according to a unified template.*

*Our long-term experience and users' interest in information in regional breakdown makes us believe that our regional statistical yearbook will continue to be a sought-after source of information for both professional and lay public. The same as in the previous years, we welcome your potential suggestions and comments as to the Yearbook's content – they can be a valuable contribution to the preparation of regional publications in 2023.*

*We express our thanks to all authors and colleagues for the effort and time they devoted to the preparation of the content as well as technical matters of the Yearbook.*
