

2. Implementation of the ENERGO 2004 survey

ENERGO 2004 survey worked on, methodically and by processing progress, application of experience from ENERGO 1997 pilot survey.

2.1 - Application of experience of ENERGO 1997 sample survey

The ENERGO 1997 pilot survey was organized by EUROSTAT for 10 Central and Eastern European candidate countries, [6000 dwellings, six page questionnaire for CR, in which in addition were surveyed recreational facilities, more cars and motorcycles) according to EU methodology, all funded by European Commission].

Herein it is necessary to express our acknowledgments to EUROSTAT specialists for guidance of the " ENERGO 1997"pilot project i.e. for obtaining our methodical and practical experiences in the survey processing and to European Commission for funding the whole project.

At the same time it is necessary to express our thanks to all participating colleagues and workmates of the headquarters and CzSO regional representations at ENERGO 2004 ensuring:

"Responsible project solvers of the ENERGO 2004 survey above all thank by this form to whole group of workmates-co-solvers in regional representations and districts - namely interviewers, administrators and senior managers of the CzSO regional representations and also to the co-solvers from departments of the CzSO central office - for devotion, qualified access and full personal workforce engagement at securing successful course of this time-consuming and labor-intensive very demanding survey".
