

## CHARACTERISTIC OF THE PARDUBICKÝ REGION

The Pardubický Region is located in the East of Bohemia. The position of the Region is further determined by the neighbouring Regions: Středočeský, Královéhradecký, Olomoucký, Jihomoravský and Vysočina. The Královéhradecký, Liberecký and Pardubický Regions together form a NUTS 2 territory – The Northeast. A part of the northeast border of the Region is also the national border between the Czech Republic and Poland. The borders of the Region are further formed by southern parts of Orlické hory (the Eagle Mountains) and westernmost parts of the Hrubý Jeseník Mountain Range. The highland parts of Železné hory (the Iron Mountains) together with Žďárské vrchy (the Žďár Hills) line the south and southeast, while the the Labe lowland is situated in the central and western parts. Orlické hory, Žďárské vrchy, and Železné hory are protected landscape areas.

The **area** of 4,519 km<sup>2</sup> (5.7% of the CR's area) ranks the Region fifth smallest among the Regions of the CR. Agricultural land makes 60.1% and arable land makes 43.7% of the total area. Forest land covers 29.7% of the Region's area. The highest point of the Region is the Králický Sněžník Mount (1424m above sea level), which is part of the third highest mountain range in the CR. The central and the top part of the Králický Sněžník mountain range, involving remains of original vegetation and moorland, has been declared a national nature reserve. The lowest point of the Region is the surface of the Labe River at Kojice (201m above sea level), near the western border of the Region.

The quality of the **environment** varies throughout the Region, owing to a great diversity in natural conditions, settlement, industrial and agricultural activities. The foothill and upland areas (lacking any rather large settlements) of central and northern parts of the Ústí nad Orlicí District and southern parts of the Chrudim District suffer from the impact of human activities in the least degree. The greatest degree of that impact is seen in the area of concentrated industrial activities, settlement and traffic – the Pardubice area. Here, the environmental damage, resulting particularly from chemical and power industry (the Paramo and Synthesis chemical works, the Opatovice and Chvaletice power plants), has grown to involve the most serious environmental problems within the whole CR.

Regarding **water management**, the Pardubický Region is an extraordinary important area with excessive water supplies, the significance of which reaches beyond the regional level, of ground water as well as surface water drawn from watercourses. The Region involves many headstreams, without any inflow pollution from other catchment areas. A rather low degree of wastewater pollution is seen in middle and upper parts of watercourses, except for the Labe River and the upper course of the Svitava River. The three largest water surface areas are the Seč Reservoir (on the Chrudimka River), the Bohdaneč Pond (on the Opatovice River Channel) and the Pastviny Dam (on the Divoká Orlice River). Some parts of the Region are under large-scale protection measures, i.e. they involve water protection zones, or natural water accumulation protected areas (CHOPAV). The ground water supplies are connected particularly with the Ústí nad Orlicí and the Vysoké Mýto syncline of the Czech Cretaceous Basin (the Ústí nad Orlicí District and the Svitavy District) and with the Labe quaternary sediments (the Pardubice District).

The Pardubický Region comprises four **Districts** (Chrudim, Pardubice, Svitavy, and Ústí nad Orlicí), and 451 municipalities as at 31 December 2012, which is the sixth highest number of municipalities among the 14 Regions in the CR). The average cadastral area of municipality 10.0 km<sup>2</sup> is the third smallest in the CR and the average mean number of population 1,145 inhabitants per municipality ranks the Region tenth in the CR. Of the Region's population, 13.7% live in municipalities under 500 inhabitants. The share of inhabitants living in municipalities of the population between 500 – 1,999, now makes 24.1%. The percentage of population living in municipalities of 2,000 – 9,999 inhabitants is 22.8% in the Region. The percentage of population living in municipalities of over 10,000 inhabitants decreased in the last years and made 39.4% as at 31 December 2012. In the Region's capital Pardubice, there live 17.3% of the population of the Region. There are 38 towns in the Pardubický Region, in which 62.1% of the Region's population live. The following towns rank among the most populated: Pardubice, Chrudim and Svitavy.

The Region's **population** was 516,440 as at 31 December 2012, which is 4.9% of the CR's total population. The Pardubice District is the most populated, followed by Ústí nad Orlicí, Svitavy and Chrudim Districts, respectively. Regarding the distribution of the population by age in 2012 when compared to 2011, there was a decrease in the 15-64 age group (by 1.0%), while an increase was observed in the 65+ age group (by 3.6%). In 2012, number of children under 15 is the highest within the last eight years. The ratio of 65+ population to that under 15 (the dependency ratio) amounted to 113.1 in 2012 (in 2011 it was 110.0). The dependency ratio for females in 2012 was 136.7, while for males it was only 90.7. This big difference is caused mainly by lower age of males at death.

The 2012 average registered **number of employees** was 174.0 thousand F/T equivalent persons. The **average monthly gross wage** in the Pardubický Region amounted to CZK 22,058 in 2012 (F/T equivalent, with workplace in the Region), which makes 87.9% of the national average (it is the second lowest wage after the Karlovarský Region). Regarding industrial breakdown in an inter-region comparison, the average

gross wage of the employed in industry was the third lowest and in construction it was the second lowest in 2012.

The registered **unemployment rate** was 9.16% as at 31 December 2012 (the sixth lowest among the Regions) and was by 0.72 percentage point higher than in 2011. The highest unemployment rate is reported in the Svitavy District (11.53%). The number of job applicants amounted to 25,264 persons and made 4.6% of the unemployed in the whole CR. The number of available job applicants was 24,776 as at 31 December 2012. Among registered job applicants, 19.2% in the Region are those in the under 24 age group. Females make less than half (47.9%) of the unemployed; handicapped persons make 13.3% of the total number of the unemployed. Regarding educational attainment, most of the job applicants are observed among persons with secondary vocational education (44.6%) and basic education (24.9%). There were 13.6 job applicants per vacancy in the Region; regarding work positions for handicapped persons, there were 35.5 job applicants per vacancy.

In 2012, the **gross domestic product** (GDP) per inhabitant was 79.2% of the CR average (by 2.5 percentage point less than in 2011). Services play a decisive role in the Region's GDP, comprising 53.7% of the Region's gross value added. Fundamental is also the industry, the share of which in gross value added of the Region in 2012 was 36.0%. The share of construction amounted to 6.3%.

One of the fundamental impacts of the disadvantageous economic development in the Region during last years is the decline of **housing construction**. In 2012 there was the lowest number of started dwellings per 1,000 inhabitants in the Pardubický Region within the last sixteen years. In comparison with the previous year, the number of started dwellings was by 20% lower in the Region this year. However, the total number of completed dwellings increased by 1.6% in the Region and the number of completed dwellings per 1,000 inhabitants was the eighth lowest among regions in 2012. The highest number of dwellings within the Region was completed in the District of Pardubice (482 dwellings); on the contrary, the lowest number of completed dwellings in 2012 was in the District of Svitavy (only 198 dwellings).

The favourable position of the Pardubický Region is a promise for its further development from the **transport** point of view. The Region has 542 km of rail tracks, the most important rail crossing stations are towns Pardubice and Česká Třebová that are part of the international rail highway Berlin, Prague, Brno and Vienna. In Pardubice, tracks of national relevance link to the main track, providing the connection to Liberec, and to Havlíčkův Brod via Chrudim and Hlinsko. The current road network comprises the total of 3,598 km, of which highways measure 9 km, roads classified into class I 457 km and roads classified into class II 912 km. The most important transit flow goes through the Region via the road No. I/35 leading from southeast to northwest via Moravská Třebová, Svitavy, Litomyšl, Vysoké Mýto and Holice towards Hradec Králové. The also important route is the road No. I/37 coming from the north via Pardubice and Chrudim towards Ždírec nad Doubravou. In Chrudim, it meets the road No. I/17 leading from Čáslav, via Heřmanův Městec, Hrochův Týnec to Zámrsk. There are 9 km of the D 11 motorway on the territory of the region. As for the air transport, the international airport in Pardubice plays the principal role, providing military and civil air traffic operation. In terms of water transport, only a short navigable part of the Labe River to Chvaletice is in use, opening a waterway to the regional capital has been postponed. One of the biggest seasonal tourist attractions is the river transport of persons operating on the route Kunětica – Pardubice – Přelouč.

Regarding **education**, there was reported in 2012 the total of 312 nursery schools in the Pardubický Region, with 18,572 children enrolled in 760 classes. Other educational establishments comprise: 251 basic schools with 41,505 pupils, 21 grammar schools with 6,014 pupils, 56 secondary schools (including secondary vocational schools) with 15,321 students of initial study (follow-up courses not included), and 10 higher professional schools with 1,142 students of initial study. University education in the Region is provided at the University of Pardubice comprising seven faculties. The number of students reached ten thousand in the school year 2009/2010 and continued to rise in following years. This rise stopped in 2012.

As for **health care**, the Pardubický Region involved the following establishments in 2012: 9 hospitals (2,557 beds), 7 specialised therapeutic institutions (1,276 beds), in that 2 therapeutic institutions for long-term patients (186 beds) and 153 pharmacies including detached workplaces. Besides the establishments mentioned above, there are 949 independent surgeries of GPs and specialists and number of other various independent health establishments in the Region (e.g. establishments run by a person with non-medical university education, independent laboratories, etc.). The 2012 F/T equivalent number of physicians was 2,003 (1,966 physicians at non-government establishments). There were 258 inhabitants per physician.

The Pardubický Region has a great potential for the development of **tourism**. One can find there lowland as well as mountainous landscape, agreeable climate as well as many places fit for bathing, water sports, hiking, cycling tourism and winter sports. Areas attractive for tourists are especially northern and eastern part of the Ústí nad Orlicí District – foothills of the Orlické hory mountains, Skiregion Buková hora (Ski resort Čenkovice, Ski resort Červená Voda) and the Dolní Morava relax & sport resort. In the Chrudim District, mainly in its southern and southwestern part, there are also many tourist centres – the most visited are: the

area around the Seč dam, areas at Horní Bradlo, Bojanov and Křižanovice in the Železné hory mountains. Agrotourism is winning popularity throughout the whole Region (in the foothill areas, in particular), especially the estates devoted to traditional horse breeding play a primary role. In 2012, there was the total of 351 collective tourist accommodation establishments with 20,260 beds in the Pardubický Region, providing service to 331 thousand guests with the average number of overnight stays amounting to 2.8. The number of collective accommodation establishments, beds in them and number of guests in the Pardubický Region belong to the lowest in the inter-region comparison.

**Cultural** establishments and activities in the Region are concentrated mostly in towns. Among the most important we can mention Muzeum loutkářských kultur (the Puppet Museum) in the Chrudim District, state chateau in Slatiňany with its horse museum, open-air (folk) museum (a set of folk constructions in Vysočina area at Veselý Kopec hill and adjacent localities of Hlinsko area). In the Pardubice District, visitors are attracted especially by the Castle of Pardubice, where one can see the exhibits of the Východočeské muzeum (Museum of East Bohemia) and the Východočeská galerie (Gallery of East Bohemia). Interesting for them is also late-Gothic castle at Kunětická hora mountain and Africké muzeum (Museum of Africa) in the town of Holic, which is devoted to Dr. Emil Holub, who was a famous traveller born in Holic. Every year, more and more visitors are coming also to the National Stud Farm in Kladruby nad Labem, which besides regular sightseeing tours organizes various actions for horse lovers, too. In the Svitavy District, tourists are attracted by the Svojanov castle or the area of the Litomyšl chateau, which was added to the UNESCO's World Cultural Heritage List in 1999. In the Ústí nad Orlicí District, well-known are ruins of the following castles: Lanšperk, Litice, Žampach. In Letohrad, tourists are interested in the Muzeum řemesel, chateau and newly reconstructed fortress Orlice. Music in the Region is usually connected with famous Komorní filharmonie (the Pardubice Chamber Philharmonic Orchestra) but also Smetanova Litomyšl (Smetana's Litomyšl), the festival of classical music, or other music festivals held in Polička (the birthplace of composer Bohuslav Martinů), which have their tradition. As for theatre, the most famous is Východočeské divadlo (the Theatre of East Bohemia) in Pardubice, which also holds a festival of comedies (Festival smíchu) from the theatres all over the Czech Republic since 2001. Already since 1995, Přelouč has hosted the awarding ceremony of Cena Františka Filipovského (the Prize of František Filipovský) for dubbing.

Regarding **sports** activities, the Pardubice Horserace Course, where the Velká Pardubická Steeplechase is held, is the best known. Motor sports fans are certain to recall the speedway race Zlatá přilba České republiky (the Golden Helmet of the Czech Republic). Moreover, the Pardubický Region ranks on the top in connection with other sports, too. It is the ice hockey with the Pardubice extra league team breeding players of international quality; it is the tennis courts frequently remembered by almost every Czech famous tennis player, because the Championship of the Czech Republic for young competitors opens professional career for the talented youth.

In the end, here are several points, for which the Pardubický Region was unique in 2012:

- the lowest number of abortions in total and induced abortions per 100 births;
- the highest share of households with great difficulty and difficulty to make ends meet;
- the lowest share of households regarding vandalism and criminality in their neighbourhood as a problem;
- the highest number of new born calves per 100 cows;
- the lowest number of dead piglets from the number of new born piglets;
- the highest average live weight of cattle for slaughter;
- the lowest number of non-residents accommodated in collective accommodation establishments;
- the lowest number of students of follow-up courses in total per 1,000 population;
  
- the second highest investments for environmental protection per capita (by the place of investment);
- the second highest share of investments for environmental protection specified to protection of ambient air and climate;
- the second lowest production of industrial waste per capita;
- the second lowest share of population aged 15-64 years in total population;
- the second highest share of household, for which costs of housing mean big problem;
- the second lowest average gross monthly wage;
- the second lowest average gross monthly wage in constructin;
- the second highest number of weaned pigs per 1 sow;
- the second lowest number of collective accommodation establishments;
- the second lowest share of non-residents in the number of guests of collective accommodation establishments;
- the second lowest number of hospitalized patients per 1,000 population;

- *the second lowest share of traffic accidents caused by pedestrian;*
- *the third highest specific emissions of sulphur dioxide (tonnes/km<sup>2</sup>; REZZO 1-4);*
- *the third highest share of agricultural land in total area of the Region;*
- *the third lowest share of population living in houses connected to public sewerage systems;*
- *the third highest total fertility rate of females;*
- *the third lowest average purchase price of family houses (CZK/m<sup>3</sup>);*
- *the third highest share of pigs per 100 ha of arable land;*
- *the third lowest average gross monthly wage professionals;*
- *the third lowest average gross monthly wage in industry;*
- *the third highest sales of own goods and services incidental to industry per 1 employee;*
- *the third highest number of started dwellings in family houses per 1,000 population;*
- *the third lowest number of beds in collective accommodation establishments;*
- *the third lowest number of crimes per 1,000 population;*
- *the third highest share of traffic accidents caused by driving under the influence of alcohol;*
- *the fourth highest specific emissions of nitrogen oxides (tonnes/km<sup>2</sup>; REZZO 1-4);*
- *the fourth highest share of cattle per 100 ha of agricultural land;*
- *the fourth lowest number of fires per 1,000 populations.*
