Methodological notes

The administrative territories of municipalities with authorized municipal office (AT MAMO hereinafter) were stipulated by the Decree of the Ministry of the Interior, already mentioned in Preface.

The Nomenclature of Municipalities with Authorized Municipal Office was introduced by Communication of the Czech Statistical Office No. 471/2002 Coll. of 29 October 2002, establishing the Nomenclature of Municipalities with Extended Powers, the Nomenclature of Municipalities with Authorized Municipal Office and the Nomenclature of the Prague Administrative Territories, which took effect on 1 January 2003.

The Yearbook contains data adjusted to territories of AT MAMO effective on 1 January 2012. There are a total of 388 AT MAMO, Prague and military domains (Boletice, Brdy, Březina, Hradiště a Libavá) are not included. The code stated behind the name of the district is the code of the district according to the classification CZ-LAU1, the code behind the name of the region is the code of the region by the classification CZ-NUTS3.

Changes in the numbers of municipalities in AT MAMO result from merging or separating of municipalities.

All data refer to the resident population of AT MAMO, irrespective of citizenship. Since 2001, the figures include (in accordance with the Population and Housing Census 2001) foreigners with long-term stay (i.e., the stay based on visa over 90 days, as stipulated by Act No. 326/1999 Coll.) and foreigners with granted asylum status (in compliance with Act No. 325/1999 Coll.). Since 1 May 2004, in accordance with amendment No. 326/1999 Coll., the figures include citizens of the European Union with temporary stay on the territory of the Czech Republic, and citizens of other countries with long-term stay. The data also contain information on events (marriages, births and deaths) of permanent residents of CR that occurred abroad.

The population as of 31 December of given year is equal the population as of 1 January of the next year. And, the population as of 31 December of given year is computed as the population as of 1 January of given year plus total population increase. It is not true for years in which the population census was held, when the stock as of 31 December of the year before census is not equal the stock as of 1 January of census year. Here it refers to the Population and Housing Census 2011 - the population as of 1 January 2011 differs from the population as of 31 December 2010.

The disagreement between the population as of 31 December and 1 January by AT MAMO could also be due to the shifts of municipalities between AT MAMO as well as to the extraordinary adjustments of the municipality population stocks. In the following overview the adjustments of AT MAMO population between 31 December of given year and 1 January of the next year are listed.

Year	AT MAMO	Code	Adjustment
2002	Velká nad Veličkou	62182	-69 osob
2002	Veselí nad Moravou	62183	+69 osob
2002	Valašské Meziříčí	72101	-11 osob
2002	Vsetín	72123	+11 osob
2006	Benešov	21011	-137 osob
2006	Týnec nad Sázavou	21013	+137 osob
2006	Havlíčkův Brod	61022	-2 osoby
2006	Světlá nad Sázavou	61112	+2 osoby

All data concerning ´age´ always refer to completed age. The dependency ratio is the number of persons aged 65 and over per 100 persons aged 0-14.

Except 'Marriages by bride's place of residence' all marriages are regionally classified into AT MAMO by permanent residency of groom. Divorces are regionally classified by last common permanent residency of spouses; births are regionally classified by permanent residency of mother, abortions by permanent residency of woman and deaths by permanent residency of deceased.

Deaths by the primary cause of death are classified according 10th decennial revision of the International Statistical Classification of Diseases and Related Health Problems (ICD-10).

Migration is the change in a place of permanent residence from municipality to municipality within the territory of the Czech Republic or across the borders of the Czech Republic (external migration). The statistics measures the number of moves, not the number of migrants – one person could move twice or more times. The term 'immigrant' is used for immigrant into a AT MAMO, the term 'emigrant' for emigrant out of AT MAMO, in both cases refer to movement across the AT MAMO line (so as including international migration). Internal migration refers to the migration between municipalities within one AT MAMO (i.e. not cross AT MAMO line). There is no internal migration within AT MAMO 42132 Krupka, 51052 Hodkovice nad Mohelkou, 62011 Adamov, 62031 Brno, 71071 Hlubočky a 81192 Vratimov, as only one municipality forms this AT MAMO.

Natural increase is the difference between the numbers of live birth and deaths, net migration is the difference between the numbers of immigrants and emigrants. Total increase is the sum of natural increase and net migration.

Symbols used in tables

- **-** *The symbol of dash in place of a figure indicates that the phenomenon did not occur.*
- **.** *The symbol of dot shows that the figure is not available or cannot be relied on.*
- **x** *The symbol of small cross shows that the figure is not applicable.*
- **0** *The symbol of zero in a table designates figures smaller than half of the unit of measure chosen.*
