

14. ENERGY

Information on the **fuel and energy consumption** is measured in all industries of the national economy for incorporated enterprises.

Data on the fuel and energy consumption are observed in the group of enterprises with 20–99 employees only at selected enterprises (the share of the sample differs by industry) and in the group of enterprises with 100+ employees for all enterprises.

The **consumption** of individual **types of fuel** includes production and non-production consumption, including input and operating consumption in electricity and heat production processes and in fuel upgrading processes, including consumption of diesel oil and gasoline for intra-enterprise transport. **Consumption of electricity** also includes own consumption for the production of electricity.
