

16. TOURISM

Tourism statistics includes data on capacity and outputs of collective tourist accommodation establishments and also data from sample survey among households on travel behaviour of residents. Besides data by region and district, also data on tourist areas and tourist regions are published. These areas were officially determined by the CzechTourism agency in 2005.

Collective accommodation establishments mean establishments with at least five rooms or ten beds that on a regular (or irregular) basis provide tourists (including children) with temporary accommodation for the purpose of vacations, trip, spa treatment, business trip, training, course, congress, symposium, stay of children at schools in nature, summer and winter children camps. They are divided by category determining the type of accommodation establishment and the class defining requirements for the equipment, level, and range of services connected with the accommodation. The collective accommodation establishments include hotels, boarding houses, hostels, holiday dwellings, camp-sites, and other accommodation establishments.

Bed places in accommodation establishments mean all permanent beds used for the overnight rest of guests (excluding extra beds). **Places for tents and caravans** mean the number of places for tents, caravans, and campers.

Guests in an accommodation establishment are all persons (including children and excluding owners and operating personnel of the accommodation establishment) who have used services of the accommodation establishment for their temporary stay. Persons, who use an accommodation establishment for a temporary stay for the purpose of employment or full-time studies, are not included. The duration of a temporary stay shall not exceed 1 year for the guest to be taken as a tourist. A person with a permanent stay in the Czech Republic is considered a **resident**. It can therefore be a citizen of the Czech Republic as well as a foreign citizen permanently living in the Czech Republic. A **non-resident** is hence a person, who permanently lives in other country (including citizens of the Czech Republic permanently living abroad).

The average duration of stay is by one day longer than the average number of overnight stays. The **net occupancy rate of bed places** gives the net occupancy rate of permanent beds that were really available to guests. The calculation is based on the average number of available beds and the number of operating days of the accommodation establishment. The **occupancy rate of rooms** gives the net occupancy rate of rooms. The calculation is based on the number of room-days (i.e. the total number of days, for which the room was occupied by at least one guest) and the total number of room-days.

The **Tourism Sample Survey (TSS)** carried out in the Czech Republic monthly is the source of data on long and short foreign as well domestic trips (yet data on foreign trips are not sufficiently representative at the regional level). The survey is based on a two-stage random sample in a sample of dwellings of sampled census districts. Members of a household are asked about trips they made in the last three months for the purpose of spending leisure time and recreation or a business trip out of their usual environment (permanent or temporary residence, workplace, school, etc.). In 2009, data were surveyed among all household members aged 15+ years, and since 2010 involvement of all household members is surveyed regardless of their age. The data ascertained in this manner are then grossed up to the whole population using mathematical and statistical methods.

A **long trip** means a trip taken for the purpose of spending leisure time and recreation, in which the person stayed overnight at least four times in succession out of their usual environment. A **short trip** means a trip taken for the purpose of spending leisure time and recreation, in which the person stayed overnight, at least once, but no more than three times in succession, out of their usual environment (weekend stays included).
