

The image shows a collage of various statistical and economic publications from the Czech Statistical Office. At the top left is a report titled 'The Czech Labour Market in the Current Economic Crisis - What Can Employers Employ?' by Katerina Dusprisova and Pavel Spalik. The central focus is the 'statistika | Economy and Statistics Journal' issue Vol. 48(4) 2011, which features a large blue title and a stylized background graphic. Below it is a chart showing 'Gross fixed capital formation' from 1996 to 2009. To the right is a detailed table of regional TFP data for 2006-2009. Other smaller documents include reports on employment, wages, and salaries; a section on 'Changes in the development during the crisis'; and a note on non-financial corporations' profits. The bottom right corner contains mathematical formulas for calculating risk premiums.

z oblastí ekonomické, sociální a environmentální. Unikátnost časopisu spojuje výstupů i jeho podpory rozhodujících procesů a způsobů prezentace.

Analýzy: Drahomíra Dubská: Impact of the Economic Crisis on the Institutional Sectors of the Czech Economy | Kateřina Duspivová, Pavel Spáčil: The Czech Labour Market and the Current Economic Crisis: What Can the Linked Employer-Employee Data Tell Us? | Kristýna

Michalski, Aleksander Mercik: *Współczesne*

Metodologie: Iva Pecáková: Alternative Approaches to the Analysis of Multidimensional Contingency Tables
