

INTRODUCTION

On 1 July 2015 a [new version of the Public Database](#) (VDB2) was launched. It is an entirely new application offering tables and graphs with improved arrangement and extended range of options. The old version of the Public database (VDB1) ceased to operate on 11 September 2015.

Tables in the publication [Okresy České republiky \(Districts of the Czech Republic\)](#) have been compiled in VDB2 since 31 October 2015 only. Archives of older issues of this publication have not been accessible any longer. Therefore one file of exports from has been created and saved as a MS Excel 97-2003 spreadsheet. Archived tables are on individual sheets always in a time series since 2005 (if available). The spreadsheet starts on the sheet 'List of chapters'. It corresponds to the structure of the archived publication and facilitates moving among individual sheets via active links.

We believe that the new form of the Public database will be appreciated and information will be found as requested. In addition to the tables included in this publication, users can find further data in [predefined tables](#) or they can define their own tables using the menu of [Customized selection](#).

If necessary you can e-mail:
