

## ***Introduction***

***This part of publication ("Balance of energy processes for fuels upgrading in 2010") take up on similar publications issued by the CSO from 1993. It presents results of yearly statistical report/return EP 8-01 processing (yearly report on fuels upgrading processes) in 2010 that are complemented by the total preliminary energy balance for 2010 (its source part without the final consumption division) compiled on the basis of data obtained from the EP 5-01, EP 7-01, EP 8-01, EP 9-01, EP 10-01 reports and from "Yearly report on the CR ES operation " (Energy Regulatory Office). All presented data will be further verified and it is possible to expect their specification within the frame of the task "Energy balance in 2010" processing. The data on some fuels kinds production and extraction between 2000 and 2010 are also a part of the publication.***

*The report EP 8-01 is submitted by the BKB, Energogas, Coke Oven Coke and Crude Oil products producers and subjects with Gas Works Gas production. It covers a small extent statistical survey. Data acquired by the EP 8-01 report enter, together with data on heat and electric energy production processes, into the energy balance transformation section.*
