

## **Annotation**

*Output of the agricultural industry (OAI) at current basic prices presented in total an amount of 98 463.6 mil. CZK in preliminary results for 2010. Whereas crop output reached to 53 477.3 mil. CZK and animal output 40 513.4 mil. CZK, the other two components contract work output (i.e. agricultural services) amounted to 2 596.9 mil. CZK and non-agricultural secondary activities (inseparable) 1 876.0 mil. CZK.*

*The crop output raised due to substantial increase in price of cereals despite decrease of their production. The animal output was except of milk lower in comparison with the previous year.*

*The estimated volume of subsidies on products for year 2010 amounted to 839.0 mil. CZK (of which 65.4 mil. CZK for crop products and to 773.6 mil. CZK for animal products). The total volume of subsidies on products in the year 2009 was 2 145.8 mil. CZK.*

*Output of the agricultural industry at the current constant prices of 2000 amounted to 97 893.2 mil. CZK, composed of crop output (sharing in with 50 388.1 mil. CZK) and animal output (contributing with 44 330.6 mil. CZK).*

*Crop output 2010 shared in OAI at current basic prices by 54.3 %; dominated with cereals (40.4 %) and industrial crops (25.2 %). Animal output shared in the total output by 41.1 % with the major proportion of milk output (45.6 %) and breeding of pigs for slaughter (22.0 %).*

*Intermediate consumption (IC) created 77.5 % of the total agricultural output (without subsidies on products). Feedingstuffs represented 36.9 % of the intermediate consumption.*
