

I n t r o d u c t i o n

Data set (Energetics - 2015), builds on the publications issued by CzSO by the year 2015 and its contents are the basic tables of energy balance of the Czech Republic (data on sources, transformation and final consumption of fuels and energy). It contains the tables of the energy balance 2015 and 2014 in the methodology of Eurostat in the measurement units ktoe (thousand tonnes of oil equivalent) and PJ. This change approached the CzSO, therefore, that the European commission carried out an inspection procedure to achieve the EU strategic objectives 20/20/20 in relation to the energy balance of Eurostat, and the use of energy balances in other methodologies could lead to wrong conclusions.
